Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

The finality of the last Office action is withdrawn in response to the insertion of claim 28 subject matter into claim 7.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection set forth herein below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-10, 23-27 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-060835, as disclosed in the translation filed by Applicant. J '835 discloses compositions for producing molded products. The compositions comprise an aromatic vinyl/hydrogenated diene block copolymer and a propylene resin. The propylene resin is described in paragraph [0015]. Electron beam curing is taught in paragraph [0021]. Alkyl-substituted styrenes, including – methyl styrene, and dienes, including butadiene and isoprene, are taught in paragraph [0017]. The mass ratio of block copolymer to propylene resin is taught in paragraph [0033]. The % by mass polymer block A in claim 25 is taught in paragraph [0011]. The number average molecular weight of claim 27 is taught in paragraph [0018].

Allowable Subject Matter

Claims 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. JP '835 does not suggest addition of a photopolymerization initiator. Thermal initiators and crosslinkers are taught when thermal polymerization is to be employed.

Conclusion

It is noted that the disclosure of EP 1 923 425 A1, which claims priority to JP 2001133898, is cumulative of JP 835.
